

V-Tech Rigger Boot

These safety rigger boots are designed in the traditional way with a whole cut leg and no front seam that would let the elements in. The pull loops aren't just sewn on either – they are riveted for good measure and there's a warm lining under the foot for even greater comfort. The innovative STS sole unit provides superior traction and stability across a wide range of surfaces and firefighter ladder grips for safe working at height. The dual comfort insole features unique airflow channels to maximise air circulation and reduce heat. With twin anti-shock foam pods the heel and the ball of the foot, this insole will provide daylong comfort where you need it most.

- Upper: Smooth leather - durable and breathable
