

110-VOLT 3 METRES 20 WATTS FLOOD LIGHT
MAXLED20

IMPORTANT

There instructions are for your safety. Please read through them thoroughly prior to installation and retain these instructions for future reference.

TECHNICAL DATA

Product code MAXLED20

1. Non-replaceable 20W LED
2. 2000 lumen (light angle 120°)
3. LED colour temperature: approx. 6400K
4. IP Rating 54
5. 3 metres cable lead
6. Voltage 110V ~50/60Hz

Socket

1. 16A socket 6.25 amp current (max 1000W)
2. Maximum links - 15 lights
3. Maximum total socket load - 1500W
4. Voltage 110V ~50/60Hz

SAFETY INSTRUCTIONS

WARNING

Check the flood light and mains cable for damage before every use. Never use the flood light if you find any damage.

- Remove all packaging, wrap etc. from the product.
- Decide on the appropriate location for your product.
- This flood light only operates from 110V, other voltages will damage the product.
- This flood light is designed for professional use only.

Warning! A damaged light or mains cable can cause fatal electric shock!

- Non-compliance poses a risk of fatal injury from electrical current!
- If the light's mains cable is damaged, it must be replaced by a qualified electrician.
- Do not use the product in potentially explosive atmospheres - danger of death!
- The flood light does not contain components that require maintenance.
- The light source in this lamp cannot be replaced; if the light source has reached the end of its service life, the entire lamp must be replaced.
- The lamp may not be opened.
- Keep the work light away from children. Children are not aware of the risks imposed by electric current.
- When the product does not light after installation:
 - (a) Ensure there is no electricity failure.
 - (b) Ensure all the connections are secured.

- Do not work near flammable gases or liquids, petrol, or paint thinner fumes for example.
- Never put anything on the product or hang anything on any part of this product.
- Never disconnect the product from power cord by pulling or tugging on the cord.
- Always disconnect the product from the power source before cleaning.
- Do not stare at operation LED light source.

INSTALLATION

- Prior to connecting to a power supply, make sure the cable is in easy reach of a mains supply.
- Ensure the flood light is adequately supported and prevent straining of the cable.
- Connect to 110V AC supply and turn on, check all lights are functioning.
- Please ensure adequate ventilation is allowed between the floodlight and any object above, in front or to either side. Minimum distance: 0.5m above, 0.3m to either side and 1.0m in front.
- This flood light is of Class II construction.
- Always disconnect the product from mains at least 10 minutes allowing to cool down before any maintenance or adjustment.

MAINTENANCE

- Check the plug, power cord, and work light housing for signs of damage before each use.
- Clean any dirt from the housing or the lens immediately, since this could cause overheating.
- The lamp can be cleaned with a clean dry cloth. Do not immerse it in water.
- The work light does not contain components that require maintenance. The flood light source in this lamp cannot be replaced; if the light source has reached the end of its service life, the entire lamp must be replaced. The lamp may not be opened.

RECYCLING AND DISPOSAL

The symbol on the product or its packaging indicates that this product must not be disposed of with your other household waste. Instead, it is your responsibility to dispose of your waste equipment by handing it over to a designated collection point for the recycling of waste electrical and electronic equipment. The separate collection and recycling of your waste equipment at the time of disposal will help conserve natural resources and ensure that it is recycled in a manner that protects human health and the environment. Please recycle where facilities exist.

Check with your Local Authority or retailer for recycling advice. For further information visit www.recycle-more.co.uk
