

# Dustlight

INVISIBLE PARTICULATE DETECTOR

Exclusively available at CMT

**CONSTRUCTION DUST IS AN **INVISIBLE KILLER**, SILICA IS  
THE BIGGEST RISK TO CONSTRUCTION WORKERS AFTER  
ASBESTOS.**

**REMOVE THE GUESSWORK, EXPOSE THE RISK.**

# THE RISK

Regularly breathing in construction dust over a long period can cause life-changing lung diseases and eventually kill.

According to HSE, Silica dust which is created when cutting, drilling, grinding or polishing materials such as bricks, tiles, concrete and mortar is the biggest risk to construction workers after asbestos.

The main dust-related diseases affecting construction workers are:

- Lung cancer
- Silicosis
- Chronic obstructive pulmonary disease (COPD)
- Asthma

# THE SOLUTION: **DUSTLIGHT**

Dustlight is a particulate detector that offers peace of mind and security to a range of sectors, especially construction.

- ✓ **Proactive and Intuitive** - Dustlight recognises invisible dust in the air and alerts quickly and unambiguously.
- ✓ **Reminds and prompts** employees to use their respiratory PPE in areas where high dust levels are detected.
- ✓ **Safety and security for both employees and employers**
- ✓ **Go above and beyond** to protect your workforce

# FEATURES
