Securasite Crowd Control Gate

Securasite Crowd Control Gates are customisable, lightweight, portable, and retractable for easy relocation. They are very unique and attractive, yet an affordable solution to security control issues for both foot and street traffic.

SECURASITE

Key Features

- Main material uses industrial grade version 6063-T5 aluminium alloy, and the gates are fully retractable.
- Powder Coated provides protection against UV, corrossions and Colour Fading.
- The main frame of our Securasite Crowd Control Gates are made of one-piece-bended durable aluminium alloy. The smooth and tubular shape of the frames makes it exterior looks simple and elegant.
- Long Life Span - The design of the curved frames has reduced PVC connectors and exposed parts. This is to strengthen the structure and increase the intensity.
- Ensure high wind resistant. Tubular is suitable for outdoor & indoor.
- Portable - One person can move and deploy the expanding gate or multiple expanding gates to easily define the barricade area.
