

Cut Level F Protection Glove

Product Code: SCRSFHM

The SCRSFHM Cut Protection Glove is a high-performance safety glove designed to provide maximum protection against mechanical hazards while maintaining excellent comfort and dexterity. Engineered for demanding industrial applications, the glove offers outstanding cut resistance, making it ideal for handling sharp materials in manufacturing, engineering, construction, automotive, and maintenance environments. Its ergonomic design ensures a secure fit and prolonged wearer comfort throughout the working day..

Key Features

- EN 388:2016 Cut Level F protection
- Excellent resistance to cuts, tears, abrasion and punctures
- High dexterity for precision handling tasks
- Comfortable fit for extended wear periods
- Suitable for dry and light industrial handling applications
- Durable construction for demanding workplace environments
- Ideal for manufacturing, engineering, construction and automotive sectors
- Available in sizes 7 and 8
- Ergonomic design to reduce hand fatigue
- Suitable for handling sharp-edged materials and components

Typical Applications

- Manufacturing and assembly
- Engineering workshops
- Construction activities
- Automotive production and maintenance
- Sheet metal handling
- General industrial maintenance
- Material handling operations

Conformity

EN 388:2016 – Protective Gloves Against Mechanical Risks

Performance Rating: **4X44F**
