OUR DELIVERY PROMISES

GET IT ANYTIME!

Get it Anytime!
We can deliver 24 hours a day 7 days a week

Whether it's 2am in Manchester or Saturday evening in central London, we can deliver 24 hours a day, 7 days a week. Charges for this service apply so please discuss with our sales team who will get you the best price possible!

GET IT NOW!

VIP Rapid 2 hour delivery to London & South East - call us for price

Having teams on site without the equipment needed causes delays - we can deliver all standard catalogue lines with our rapid VIP 2 hour delivery. (If you require VIP delivery outside our area shown, just give us a call). Subject to availability.

GET IT TODAY!

Order by 11am for Same Day Delivery to London & South East at no extra cost!

Any orders received by 11am for delivery within our same day delivery area will be delivered same day at no extra cost. If you need same day delivery outside our area shown, no problem. Call our team to discuss.

GET IT TOMORROW AM!

Order up to 7pm for next morning delivery nationwide at no extra cost!

We are a flexible supplier. You can order from 6am to 7pm Monday to Friday. All orders placed by 7pm are delivered next day before midday as standard at no extra cost!*

GET IT IN IRELAND!

Get it in Ireland! Fast delivery available from our Dublin depot

We deliver your goods to you from our Dublin depot, too. If you require more details on the various services available please speak to our sales team today.

NORTH ICON DENOTES IN STOCK IN WIGAN

***Here are our simple no-hassle delivery terms**

1. All services offered above are subject to our standard minimum order value of £150. A small order contribution of £8.95 will be added to any orders under £150 unless otherwise agreed with your account manager.
2. All services offered are for standard stock items. We endeavour to stock most items shown in this catalogue but from time to time some items may be out of stock and we will let you know at the time you place your order.
3. Order cutoff time for printed clothing orders is 3pm for next day delivery, and we cannot guarantee same day or VIP delivery on printed clothing. However we will endeavour to fulfil your requirements as quickly as we can.
4. Extra delivery charges may apply for deliveries to IOW, Isle Of Man, Channel Islands and parts of Ireland and Scotland.

Please note that printed and embroidered goods, and any goods ordered as a special are non-returnable under any circumstances and cannot be cancelled once the order has been processed. Standard goods from our catalogue can be returned providing goods are in perfect condition and in the original packaging, which will incur a minimum 15% restocking charge. Return requests must be submitted to our customer services department within 15 working days, and the goods returned to us within 20 working days. If you require us to collect the goods, a minimum collection charge of £15 will apply and will be calculated by location and volume.

All products offered in this catalogue are subject to our terms and conditions of sale. A copy of our terms and conditions is available on request. Due to constant product development we reserve the right to offer a product that differs from one represented in this catalogue. All product details including pricing are subject to change without prior notice. All prices exclude VAT where applicable.

WELCOME

To Your New 2021 - Edition 12 Catalogue

We are delighted to present to you our brand new product guide for 2021. With new updated sections to simplify everything and an easy-to-use layout, this guide makes buying with CMT even more convenient for you.

All of this combined with our excellent service, highly competitive prices and FAST delivery makes CMT the best choice for all of your construction equipment and consumables.

We appreciate your business and look forward to hearing from you soon.

Born in 2010, CMT Group has evolved from a small business to one of the largest independent construction equipment suppliers in the UK. We may have grown a lot in the last ten years, but we haven't forgotten our roots; customer care remains our primary focus, and with a carefully developed supply chain, we can guarantee that our customers always get top quality products and get them in no time.

Create

Creation starts with manufacturing. With the dedication to manufacture as much in-house as sustainably possible, rest assured, we produce excellent quality products. We are responsible. We consider our carbon footprint throughout the manufacturing process.

Creation doesn't stop at manufacturing; it spans across every business function. A company is nothing without its people. We are committed to creating jobs and opportunities wherever we can - we create environments for growth and fulfilment. We're proud of the culture and values we have instilled. Apprenticeship programs are commonplace; we help young people enter the working world with confidence and valuable experience. In return, they bring in new perspective and ideas.

Friendly

Agile

Deliver

We deliver on our promise of supplying high-quality products, and we do this in industry-leading times. We know how stressful it can be waiting for supplies to arrive. It can put a spanner in the works. With a range of delivery options, including nationwide next morning and VIP 2-hour delivery, you can rest assured that we will waste no time getting your products to you.

With an electric fleet keeping the carbon footprint down, and recent expansion to the North of England and France, we always deliver on quality, and we do it fast.

Sustain

Sustainability is about long-term viability; about changing with the times. At CMT, this translates to making sure we seek out your feedback and, more importantly, act on it. We listen to your thoughts and needs, allowing us to grow as a business, guaranteeing that we are always offering the things you need at the prices you want to pay. We will grow with you.

We continuously work to develop more environmentally sustainable conduct, with new sustainable products released every month and our electric vehicle fleet bringing you your products without a trail of fumes. We also regularly share exciting news about eco-products and projects to help share just how the industry progresses with environmentally conscious practice.

Solutions

Trustworthy

Nationwide Delivery Service

Forget street names, postcodes and long coordinates. The world is now divided up into 3x3m squares thanks to what3words.

Our fleet uses what3words to easily locate a precise location for delivery. Whether you're in the middle of nowhere, in a built-up area, or on a huge site with multiple drop off locations; CMT and what3words have you covered.

Our own vehicle fleet is constantly expanding, now delivering the vast majority of our orders nationwide and offering full flexibility & traceability every step of the journey. As we've expanded our network, we understand that it is essential that we deliver in a sustainable manner. Our ongoing transition to electric vehicles is a key part of our sustainability plan. Processes utilised include the use of picking zones, twenty-four-hour operations and staggered despatch times, allowing us to efficiently despatch thousands of orders a day.

WHAT3WORDS

We stock a great range of OTEC Diamond Blades, with specifications for whatever job you have at hand. Whether you need to cut through tiles, concrete, clay, stone, granite, marble or brick; we have something suitable for you.

A jack of all trades, MAX provides a range of top quality products - from reinforced protective boots and thermal gloves, to high-quality pressure washers and insulated shovels.

With high quality and innovative designs, SafeSmart Access are a leading provider of access equipment. Platforms, podiums, ladders and panels; they have resilient and effective solutions for every application.

Our Accreditations

Product quality is paramount. All products must comply with the latest regulations and exceed industry best practice - it's imperative. As active members of the BSIF Registered Safety Supplier Scheme, we hold to strict guidelines that ensure high quality and compliance. We don't regard this as optional.

BSIF hold regular audits to ensure there's no compromise on quality or legal standards. As well as this, we manage product approval and certification in-house, giving us total control. Our experienced compliance team ensure all products stay compliant and up to date with current legislation, and can prove this for every item. Where relevant, this includes specification sheets, declarations of conformity and all associated documents.

• Robust

• Secure

Service Expansion

We've been spreading our wings and have recently opened warehouses not only in the North of England, with one now in Manchester, but also in Paris, France. This exciting new endeavour will help us to continue providing excellent service times to our clients across France.

This move is part of our international expansion plan for 2021, as we look to continue opening strategic locations worldwide so we can better support and cater to our international clients.

Of course, we couldn't cross the Channel before expanding to the North. Our Manchester branch is now our largest distribution centre, allowing us to take our 2 hour VIP delivery to the North and keep our customer's service as personal as possible.

**BREAST
CANCER
NOW** The research
& care charity

We are proudly in partnership with Breast Cancer Now, a UK based charity supporting those diagnosed with breast cancer and working on amazing research to improve our understanding of the disease.

We are working to raising £1million to help them fund world-class research and life changing facilities and keep providing those with breast cancer with vital support.

We developed our iconic pink face masks to create a functional face covering with a striking image to help spread the word about the effects of breast cancer and the amazing work Breast Cancer Now does. We understand that raising awareness is key to progress, and the pink facemask a great way to get the conversations started.

OTEC DIAMOND BLADES

a cut above the rest

Since 1992 OTEC diamond blades have been leading the field in the supply of professional diamond tools to the construction and civil engineering industry, and we're proud to be the number one brand in the marketplace.

OTEC diamond blades have been proven throughout the last 28 years to provide high performance and durability, with an excellent track record of safety. These three key features are the reason OTEC are the approved diamond tool brand to so many of the UK's biggest contractors.

Blow Out Pump Hole Cleaner

- Ideal for cleaning dust from drilled holes prior to applying bonded anchors for installing mechanical anchors
- Hole cleaning is necessary for correct loads
- Manual, easy to use
- Serial application
- Approved for use in:
 - Cracked concrete
 - Non-cracked concrete C20/25-C50/60
 - Aerated concrete block
 - Hollow Sand-lime brick
 - Solid Sand-lime brick
 - Hollow brick
 - Hollow lightweight concrete block

HOLE SAWS & ARBORS

Bi-Metal
Hole Saws

- Features a smooth and fast cutting action
- Aggressive material penetration and swarf clearance
- 38mm cutting depth
- Will cut thin and thick gauge materials
- Suitable for cutting steel, aluminium, sheet metal, metal/mild metal, non-ferrous metals, cast iron, hard/soft wood and PVC

ALL STEEL TOOLS

Our best-selling range of tubular steel shafted solid socket shovels are designed for the heavier usage involved on building sites. We rotary weld our contoured steel handles into the body of the shovel socket for extra strength and rigidity - thus producing a very robust yet lightweight tool for digging.

ASH HANDLED TOOLS

Most wooden shafted tools are available with 'T' or galvanised steel, heavy duty 'MYD' grips. We only use best quality, specially selected slow growing, straight grained hardwoods. The 'flower' of the grain is on the side of the handle for greater strength and flexibility – the strong, straight grain running from front to back. The MYD is ergonomically designed to comfortably fit the largest of hands.

INSULATED TOOLS

We provide a comprehensive range of insulated tools to suit all your needs, whether it's shovelling out, breaking ground, laying pipes or backfilling trenches. Each tool is individually flash tested to 10,000V and fully compliant to pass BS8020: 2011. With over 150 cable strikes reported a day, our insulated tools are essential to keep your workers safe in risk areas.

POLYFIBRE TOOLS

Our PolyFibre range of solid forged Contractors Tools will not rot, shrink, dry out or become more susceptible to breakage through periods of inactivity. They offer the worker a high degree of fibreglass strength along with the comfort of a profile moulded PYD hand grip. Injection moulded polypropylene sheathing totally encloses the polyester resin fibreglass core ensuring reliability and virtually eliminating the danger of handle breakage and potential injury.

TOOLS & GROUNDWORKING

Tool Tethering

Tethering Your Tools	110
Common Tether Points	112-113
Tool Lanyards	114-115
Anchor Points	116
Tether Accessories & Storage	117
Learning Hub Board	118

TETHERING YOUR TOOLS

ON SITE, SAFETY WHEN WORKING AT HEIGHT IS PARAMOUNT

Dropped tools present a danger at almost any height, regardless of the tool weight and this ingenious and hassle-free tethering system significantly decreases the chance of tools being dropped. **It's simple:** follow the three steps and select the correct product for your task from each step to complete your unique tethering system.

1

COMMON TETHER POINTS

Not all tools are created tether-ready. It's as easy as creating a secure attachment point on the tool you are using and ensuring the tool weight does not exceed the maximum allowed for the tether point. Go to pages 112-113

2

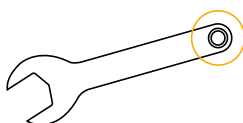

TOOL LANYARDS

Choosing the best tool lanyard for the job depending on the task and weight of the tool ensures safety first in your working environment. Go to pages 114-115

3

ANCHOR POINTS

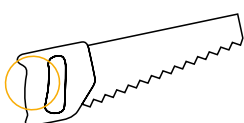

Every tool lanyard needs an anchor. Whether it's on your wrist or belt, make sure it's secure with one of these weight rated anchors. Suggested maximum tool weights for wrist anchor are 1.5kg and for belt anchor 2.5kg. Go to page 116

Captive Holes

Holes built into the body of the tool

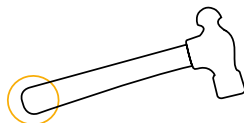

Instant Tether System
Tether Loop
Tether Ring
360° D-Ring Loop
8 Ring Tether

Captive Handles

Closed loop built into the structure of the tool

(See page 115)

101519
NLG GO Bungee Tool Lanyard, Twin
CMT Code: **NLG101519**
(See page 115)

Tether any tool in 3 simple steps

Tether Point

Create a secure attachment point on the tool.

Tool Lanyard

Choose the best tool lanyard for your task.

Anchor Point

Select between a wristband, belt, harness or fixed point.

Video Guide

Watch how to install every tether point:

neverletgo.com/guide

1: COMMON TETHER POINTS

Tether Loop

- Aircraft-grade steel core

Code		PRICE EACH			📦
		50+	20 - 49	1 - 19

SOUND CONTROL SOLUTIONS

Hushtec Global was born with a passion of bringing to market innovative solutions that protect people, the environment and increase health and safety measures across a wide range of industries.

Hushtec are a worldwide practical safety solutions provider that were formed as a result of a driven family business committed to continuous development and improvement.

HUSHTEC ROCK BREAKER ATTACHMENT

Rock Breaker Attachment

NEW

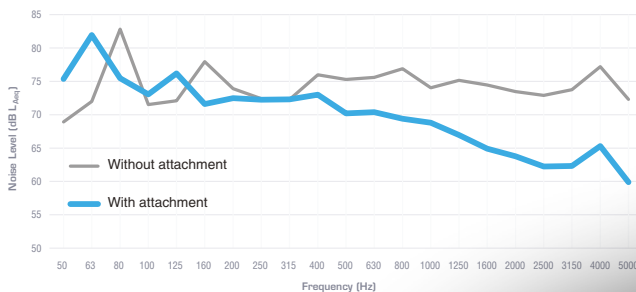

The all new Hushtec Rock Breaker noise control attachment was developed to mitigate the hammer noise effects generated within the breaker by controlling and absorbing noise at source. Through considerable research, the conclusion was made that a significant majority of the noise was generated within the breaker unit itself rather than the pick hitting the concrete.

- Custom manufactured to suit various attachments ranging from 3 - 100T in size
- Fire Retardant & Water Resistant
- Flexible, strong with optional cut-outs to accommodate for hydraulic hose's/ grease knuckle points
- Ripstop PVC coating for additional strength
- 100mm Velcro overlaps to ensure 100% noise barrier and minimal noise leakage points

NOISE TESTING

THIRD OCTAVE BAND SPECTRA FOR MEASUREMENTS

MEASUREMENT RESULTS

Rock Breaker Attachment	Duration (m:ss)	Noise Level
On	6:25	78 dB LAeq
Off	7:35	86 dB LAeq

HUSHTEC BARRIERS

Performance Series Barrier

NEW

We have proven through extensive trials, tests & re-designs that our panels are incredibly durable. We have combined the most enduring material properties to provide a weatherproof and UV-resistant acoustic panel that will withstand the toughest conditions with minimal deteriorations.

- Noise absorption of up to 75%
- Custom size panels available
- Full printed personalisation available to enhance your company brand and environmental image
- Quick and easy to erect
- Can also control the spread of dust and fumes
- Weather and UV Resistant

Types & Features Of Resins Available

Types	Strength Performance Level	Cracked Concrete	Non Cracked	Indoor Use	Outdoor Use	Wet Application	Low Odour	Use With Rebar	Cure Speed	Suitable for use in all general masonry
Pure Epoxy	Extreme	✓	✓	✓	✓	✓	Solvent Free	✓	Slow	✓
Vinylester	High	✓	✓	✓	✓	✓	Styrene Free	✓	Fast	✓
Epoxy Acrylate	Medium	✗	✓	✓	✓	✓	Styrene Free	✓	Fast	✓
Polyester	Standard	✗	✓	✓	✓	✓	Styrene Free	✗	Fast	✓

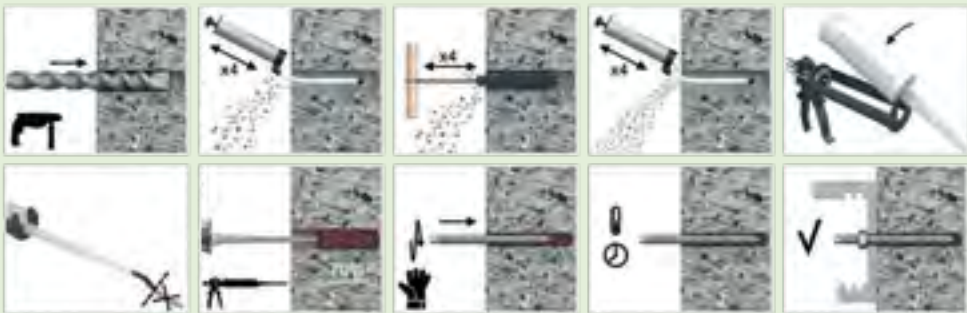

General Information:

- Cracked Concrete - Determined by structural engineer according to fixing application.
- Styrene Free - Low odour. More expensive. Better performance, higher strength. Friendly to environment. A+ Rating VOC content.
- Wet application - Curing time is twice as long and slightly lower performance. All performance testing is done in wet so stated figures are accurate for wet application. Performance in dry will be higher than stated figures.

CHEMICAL ANCHOR RESINS

PUR500585 - PUR Epoxy Solvent Free Chemical Anchor Resin 585ml

Product Description

PUR 500 is a 2 component high strength pure epoxy chemical anchoring resin system. It is designed for deep embedment and large diameter holes due to its zero shrinkage, and longer working times. For diamond drilled holes, with rebar, and in areas of high chemical exposure eg. Seasalt and swimming pools.

Use MET585 for correct applicator

Features & Benefits

- High bond strength with High load resistance
- Used with all grades of threaded rod and rebar in accordance with TR029
- Ideal for deep embedment installations
- Used in non-cracked and cracked concrete
- Used in dry and wet concrete and also in wood
- Used in flooded holes
- Used for overhead applications
- ETA approved for diamond drilled holes
- Ideal for elevated temperatures - temperature ranges I, II and III
- ETA approved for rebar installations under TR023 and EN1992-1-1:2004 EC2
- Zero shrinkage enables large diameter installations
- **ETA approved for Seismic Loads C2**
- Manual cleaning up to 20mm diameter and embedment depths of 240mm
- Independently tested and approved - anchor life 50 years
- 24 Month shelf life
- A+ Rating VOC content

Approvals

- ETA Option 1 ETAG 001 for cracked concrete with studs and rebar TR029
- ETA Option 1 ETAG 001 for rebar TR023 : Approved for Seismic Loads C2
- F120 Fire Test report • ICC-ES Approval ESR 3853
- BS6920 for use with potable water WRAS Approved 1309522
- ETA approved in flooded holes, wet and dry concrete
- Tested according to LEED 2009 EQ c4.1, SCAQMD rule 1168 (2005)

MAXCR04 - MAX Vinylester Styrene Free Chemical Anchor Resin 410ml

Product Description

MAX Vinylester is a 2 component high strength 10:1 ratio chemical anchoring resin system. It is designed as a fast curing high strength resin fixing anchor for very high loads and critical and overhead fixings especially in corrosive environments, or damp conditions.

Use MET410 for correct applicator.

Features & Benefits

- High bond strength with High load resistance
- Used with all grades of threaded rod and rebar in accordance with TR029
- Used in non-cracked and cracked concrete
- Fast gelling and curing
- Used in dry and wet concrete
- Used in critical or overhead applications
- Used in corrosive environments
- ETA tested based on life of anchor 50 years
- Used for elevated temperatures - temperature ranges I, II and III
- Used for post installed rebar installations under TR029 and TR023
- Low shrinkage enables large diameter installations
- Close edge distance and small spacing
- Manual cleaning up to 20mm diameter and embedment depths of 240mm
- Independently tested and approved

Approvals

- ETA Option 7 ETAG 001 for uncracked concrete with studs and rebar TR029
- ETA Option 1 ETAG 001 for cracked concrete with studs
- ETA for post installed Rebar TR023
- Fire approved R180
- Tested to BS6920 for use with potable water
- Tested according to LEED 2009 EQ c4.1, SCAQMD rule 1168 (2005).

CHEMICAL ANCHOR RESINS

MAXCR03 - MAX Epoxy Acrylate Styrene Free Chemical Anchor Resin 410ml

Product Description

MAX Epoxy Acrylate is a 2 component high strength 10:1 ratio chemical anchoring resin system. It is designed as a fast curing high strength resin fixing anchor for high loads and medium loads and is particularly advantageous for fixings in damp environments or with chemical exposure.

Use MET410 for correct applicator.

Features & Benefits

- High bond strength with High load resistance
- Used with all grades of threaded rod and rebar
- Used in concrete and masonry
- Fast gelling and curing
- Used in dry/wet concrete and flooded holes
- Resistance to chemicals and damp conditions
- Close edge distance and small spacing
- European approval for use in masonry with nylon sleeves
- Economical fixing resin
- Extremely versatile
- Styrene free with low odour
- Manual cleaning up to 20mm diameter and embedment depths of 240mm
- Independently tested and approved

Approvals

- 18/0800 - ETA EAD 330499-00-0601 M8-M24 Threaded Rods 8-25mm Rebar
- 18/0799 - ETA EAD 330076-00-0804 M6-M12 Masonry Installations.
- CE Certified 1404-CPR-3054/3053 - ZAG, Slovenia.
- Tested according to LEED 2009 EQ c4.1, SCAQMD rule 1168 (2005).
- WRAS Approved for use with Potable drinking water no. TBA.
- A+ Rating VOC content

MAXCR02 - MAX Polyester Styrene Free Chemical Anchor Resin 300ml

MAXCR01 - MAX Polyester Styrene Free Chemical Anchor Resin 410ml

Product Description

MAX Polyester a 2 component high strength 10:1 ratio chemical anchoring resin system. It is designed as a fast curing high strength resin fixing anchor for high loads and medium loads and is particularly advantageous for fixings in masonry due to the European approval and gives excellent value for money. Use MET410 or RS300G for correct applicator.

Features & Benefits

- Good bond strength with High load resistance
- Used with all grades of threaded rod
- Used in concrete and masonry
- Fast gelling and curing
- Used in dry and wet conditions
- European approval for use in concrete ETAG001 Option 7
- European approval for use in masonry with nylon sleeves
- Close edge distance and small spacing
- Also suitable as a filler for gap and crack filling
- Economical fixing resin
- Extremely versatile
- Styrene free with low odour
- Close edge distance and small spacing
- Manual cleaning up to 20mm diameter and embedment depths of 240mm
- Independently tested and approved

Approvals

- ETA ETAG 001 Option 7 M8-M16
- ETA ETAG 029 for Masonry Size M10
- ITB approved AT-15-6900:2011 - ITB-978/W
- Association Socotec Approval CAZ 0834/1
- Tested according to LEED 2009 EQ c4.1, SCAQMD rule 1168 (2005).
- A+ Rating VOC content

SUBMERSIBLE PUMPS

Submersible Pumps

For use in civil engineering, construction, landscaping, utilities and flooding emergency applications.

In these environments you need a pump that can handle the unknown subsurface conditions of mud, sludge, sand and other debris without breaking down.

SUBPMP1

- Robust & compact contractor pump
- 50mm (2") outlet
- Tough steel base & body

SUBPMP2

- Puddle sucker pump able to pump water down to 1mm
- 25mm (1") outlet
- Tough steel base & body

WET CONCRETE EQUIPMENT

**Belle MiniMix
150 Cement Mixer**

Built for site durability, these are quality, portable mixers for all small to medium building projects. The number one choice for mixers worldwide

- Compact & portable for easy transportation
- Complete with barrow height swivel & stand
- Extra thick drum with quick mix paddles
- CE compliant with NVR (No Volt Release) safety power switch
- 130 litre drum capacity

CMT are the first UK manufacturer to produce certified Type II, IIR and 3-Ply face masks

**No.1 UK
Manufacturer
of Certified
Face Masks**

Our extensive knowledge of personal protective equipment and our commitment to leading innovations in safety, led us to start manufacturing surgical and standard use masks. Producing millions of masks per week with constant expansion to accommodate demand.

Masks are fully certified to EN14638:2019, with official certification and test reports in English - making it clear and simple to process through your own compliance systems.

Production facilities are based at the same complex as our head office, with over 400,000 sq. ft. of manufacturing and warehousing. Get in touch to book a visit, and see the manufacturing process from raw material to finished masks with your own eyes.

Type II, IIR and 3-Ply face masks are available in a range of pack sizes and packaging options, including own branding

Our focus is on helping you in guaranteeing a consistent, secure supply of UK manufactured masks at more competitive rates than offshore-sourced products.

Benefits of ordering through an accredited UK supplier rather than importing:

- Removes any risk of inconsistent supply
- Save weeks of time on delivery
- Deal with a professional UK team
- Avoid overstocking with reduced MOQs
- Supports UK manufacturing
- Avoid exchange rate fluctuations
- Supports our economy

Specification for Type II & IIR

These high-quality products are independently tested and accredited by ISO 17025 accredited laboratories, in line with all elements of the following international standards. Test reports and other documentation are available on request.

Full product name:	Disposable Non-Sterile Medical Face Masks Type IIR 3-Ply
Product size:	180mm x 90mm (ear loops = 180mm)
Product Weight:	2 grams
Product Material:	Inner layer: White spunbonded non-woven polypropylene 25g/sqm
Outer layer:	Blue spunbonded non-woven polypropylene 25g/sqm
Filter media:	Meltblown white non-woven polypropylene 25g/sqm, 0.35mm thickness
Elastic strap:	2mm thick white elastic – latex free
Nose piece:	3mm thick metal wire encased in white plastic, 165mm length
Product Performance:	EN14683:2019 Bacterial Filtration Efficiency (BFE) \geq 99% Differential Pressure \leq 10.2 Pa/cm ² Synthetic Blood Resistance: PASS (2R only) Microbial Contamination/Bioburden \leq 23 C.F.U./g
Product Colour:	Blue / White
Packaging Size:	70mm x 200mm x 100mm
Packaging Units:	5, 10 or 50 per inner box
Manufacturer:	CMT Equipment LTD – Trident Works, Mulberry Way, Belvedere, London, DA17 6AN
Storage Conditions:	Store in a well-ventilated room where the relative humidity does not exceed 80%. Avoid high temperatures, keep away from fire and flammable materials.
Shelf Life:	5 years in original packaging
Handling:	Keep in original packaging until use – do not reuse. Replace when damp or damaged
Conformities:	EN 14683:2019; CE Marked; Registered with MHRA. Produced in accordance with MDR 2017/745. Class I medical device (non-sterile)
Dermatological Tolerance:	No known intolerance, does not contain latex
Conditions:	Non-sterile

INTRODUCING AQUAPAX WATER

Sealed and protected from light and air, in wholly recyclable, safely reusable, sustainably produced, non-leaching paper cartons, means Aquapax elevates itself above the ongoing war on plastic: it makes Aquapax unique in the market.

Most of our wholly recyclable carton material is paperboard made from trees, sourced from sustainable FSC Certified forests. Our 500ml cap is made from sugar cane, a natural plant that just grows back!

Multi-award winning Aquapax is also one of the purest waters in the world and the ever-increasing consumer demand for convenient, pure, additive-free, portable drinking water, is clear! Hence our passion for Aquapax.

ONE OF THE PUREST WATERS IN THE WORLD.

Aquapax Spring Water Cartons

- The recyclable alternative to plastic bottles
- Packs of 12
- 500ml

THINK INSIDE THE BOX
 AQUAPAX CARTONS HAVE A LOWER CLIMATE IMPACT
 COMPARED TO ALL ALTERNATIVE FORMATS

A
Sustainable
 AQUAPAX carton strength is from renewable FSC timber sources

B
Plant Based
 By weight, AQUAPAX contains at least 62% plant-based material

C
Recyclable
 The whole AQUAPAX carton can be recycled into useful new products

green rhino®

Smart Pollution Prevention Products

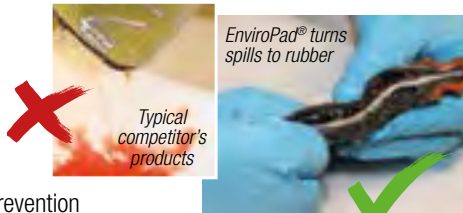

EnviroPad®

The ultimate product for drips and spills

The EnviroPad® captures and solidifies oil, diesel and other hydrocarbons. Unlike typical products which work like a sponge and are prone to leak, EnviroPad® uses a proprietary blend of polymers which immediately starts to turn the spill solid, permanently capturing it within the filtration membrane. This eliminates unwanted leaks, reduces waste and importantly saves times and money.

- Best oil retention rates on the market, up to 44 litres
- Unrivalled cost per litre compared to the marketplace
- Usage instructions printed on the EnviroPad®
- Clean, safe, reliable pollution prevention
- 5 different sizes available

EnviroPad Oil Retention Mat

- Turns oil into rubber for highly efficient spill containment
- Solidifies the spill so contaminants cannot leak out
- Clean, safe, reliable pollution prevention
- Avoid fines and prosecution from environmental regulators

YOUR BEST FIGHTING CHANCE

Are you prepared for Cardiac Emergencies?

Lifesaving, **Pure and Simple**

HEARTSINE® DEFIBRILLATORS
The perfect blend of Quality and Price

The best things in life are often simple.

That's true for the best lifesaving technology as well. The simple truth is that SCA strikes from 7 million people a year worldwide with no warning. There's little time to react and even less time to think.

So your AED solution must be close at hand, reliable and effective.

Defibrillators Save Precious Minutes

Because every second counts

Every minute that passes without defibrillation reduces survival rate by 7–10%
Increase The Chance

DID YOU KNOW?

13% of workplace fatalities are from Sudden Cardiac Arrest (SCA)

HEARTSINE DEFIBRILLATOR PRICING

HeartSine Samaritan 360P

Fully Automatic Defibrillator
with CPR Metronome,
visual and voice prompts

HeartSine Samaritan 500P

Semi-Automatic Defibrillator
with CPR Metronome,
visual and voice prompts and patient
specific CPR feedback

INCREASE THE CHANCE Your Complete Site Package

The Defibrillator + Carry Case + Internal Wall Cabinet + AED Prep Kit + Signage

• EASY TO USE • FASTEST TIME TO FIRST SHOCK • HIGHEST INDUSTRY IP RATING OF IP56
DELIVERS A LIFESAVING SHOCK IN MORE CASES THAN ANY OTHER DEFIBRILLATOR.

AEROHAZARD® SHARPS & MEDICAL WASTE PRODUCTS

A wide range of waste disposal containers which are designed to meet user's demands for strength, simplicity & value. This range offers outstanding protection against penetrating sharps & leaking fluids due to its rigid polypropylene construction & wall thickness. Assembly is fast & permanent; simply press the lid around the rim of the container until it snaps into place. A simple closure mechanism allows single handed disposal & most items have a temporary & permanent closure feature.

Single Sharps Needle Disposal System

a new era

IN SAFETY FOOTWEAR

The Worlds first hi-visibility 360° safety boot, designed and manufactured with innovative technical performance in mind to create, the most comfortable safety boot available today, that can withstand the harshest of working conditions.

STAY SAFE

STAY SEEN

360° HI VISIBILITY

In daylight, lowlight and at night:
 EN ISO 20345 S5 HRO CI HI SRA
 EN ISO 20471
 RIS-3279-TOM
 EN 1150

HYDRO CONTROL

2mm airmesh network wicks saturated air to the exterior of the boot.

100% WATERPROOF

Fully waterproof to the very top of the boot.

THERMAL DEFENCE

A boot for all temperatures including thermal protection down to -40°C.

CRUSH PROTECTION

Fibre glass non-metallic toe cap: 200J EN 12568

RESISTANT

Resistant to fuel oil and hydrocarbons.

ANTI-FATIGUE

Designed for all day wear; supports natural posture and spinal alignment, reducing wear and tear on lumbar vertebrae.

STABILITY & ANTI-SLIP

Excellent stability on rough/uneven ground. Superb grip on typically hazardous surfaces such as wet rock and wooden sleepers.

PIERCE PROTECTION

Flexible Kevlar non-metallic penetration resistant midsole: 1100N EN 12568

GLOVE TYPE GUIDE

European Standards

Implies that the glove comply with the basic requirements laid down by the EC Regulation: Personal Protection Equipment.

Simple Design (Category I)

For areas of 'minimal risks' where the effects of not wearing a glove are easily reversible or superficial. Such products are self-certified.

Intermediate Design (Category II)

For areas of 'specific risks' i.e. mechanical risks. Such products would have been EC type tested against European test methods and certified by a notified body.

Complex Design (Category III)

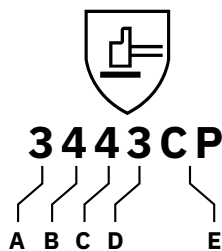

For areas/application that can seriously or irreversibly harm the health. Such products, in addition to the CE type test, will also have to be either produced under an approved quality system or be tested on an annual basis

Safety Standard Symbols - What to look out for

Each glove has its own individual rating for each standard it qualifies for. Against each product there will be standards symbols where appropriate, clearly displaying the particular safety standards that the glove complies with. This will help you quickly see what you need to know about the glove, helping you shop more efficiently.

What the numbers represent

Mechanical Hazards: EN388

- A** - Abrasion resistance 0-4
- B** - Circular blade-cut resistance 0-5
- C** - Tear resistance 0-4
- D** - Puncture resistance 0-4
- E** - Straight blade cut (TDM) resistance A-F (f)
Impact resistance P if passes

Performance Level

An "X" can be shown in place of any of the first 5 digits underneath the pictogram, where the test was either not carried out, not required or not suitable.

EN388
PROTECTIVE AGAINST
MECHANICAL RISKS

EN374-2
BIOHAZARD
RESISTANT

EN374-3
CHEMICAL
RESISTANT

EN407:2004
THERMAL HAZARD
PROTECTION

ISO 10819
MECHANICAL
VIBRATION & SHOCK

**EUROPEAN
CONFORMITY**

CUT RESISTANT

Protects hands from sharp tools or objects

PUNCTURE RESISTANT

Protection against getting pierced or pricked

COLD PROTECTION

Protects hands when handling cold objects

DISPOSABLE

Protection against cross contamination

MECHANICS

Protects hands in general assembly environment

ANTI-IMPACT

Protection against impact damage

TOUCH-SCREEN

Enables you to use a touch screen device

CHEMICAL RESISTANT

Protection from harmful chemicals/substances

GENERAL PURPOSE

Protects hands when performing general tasks

ELECTRICAL PROTECTION

Protects the wearer from electric shocks

HEAT/FLAMES/ARC PROTECTION

Protection when handling hot objects

ANTI-VIBRATION

Protects hands from vibration

WATER RESISTANT

Protection in wet conditions

Changes to EC standard EN 388

During 2016 a new version of EN 388, Protection against Mechanical Hazards, was published. It allows products offering higher classifications of cut levels to be identified.

What has changed

Any sample tested for cut resistance using the existing coup method, which blunts the blade used in the test, will have to be additionally tested using the ISO cut method. There will be 6 cut levels defined on the ISO cut method. Levels A, B and C are new. Level D is of a different value to the level previously quoted as 4. Level E is the same value previously quoted as level 5. Level F is also new and is the highest cut resistance value.

Level A	Level B	Level C	Level D	Level E	Level F
2	5	10	15	22	30

Back of hand protection (impact protection testing) is now included.

3443CP

3 - Means the sample achieved level 3 for abrasion

4 - Means the sample achieved level 4 for coup cut

4 - Means the sample achieved level 4 for tear

3 - Means the sample achieved level 3 puncture

C - Means the sample achieved level C for ISO cut which was tested due to blade blunting during the coup test

P - Means the sample passes requirements for impact protection

SONIS™ EAR DEFENDERS PEAK AT AN UNBEATEN 37 SNR

The Sonis™ range has been stylishly designed with a traffic light colour code for easy identification. Materials have been chosen for both performance and comfort for extended periods of use.

✓ PERFORMANCE

The Sonis™ range of ear defenders have been designed by the JSP R&D team. Working with a leading UK acoustic engineering research facility they have developed an ear defender range that peaks at an unbeaten 37 SNR.

✓ COMFORT

The over-moulded headband has a built in comfort area with ventilation. The headband force and the cushion surface area work together to provide optimum cushion pressure and comfort.

✓ CUSTOMISATION

Sonis™ cups can be coloured to meet a corporate identity. They can also be printed with a company logo for improved brand recognition and to discourage theft. MOQ's apply.

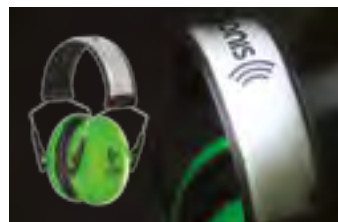

✓ ADJUSTABLE STEEL ARMS

To facilitate even distribution of pressure the wearer can tilt and adjust the position of the earcup for optimum comfort and fit.

✓ HYGIENIC

The headband is manufactured from TPE, making it easy to wipe clean. The sealing rings are easy to replace. Hygiene kits are available for each model.

✓ EXTRA VISIBILITY

The Sonis™ range is available with extra visibility cups and a reflective head band for added low light protection.

SILEX, THE NEW MODEL WITHOUT COMPROMISE

Bollé Safety continues to innovate, again and again, offering you solutions adapted to your needs while preserving the optimal quality of its products.

- **No compromise on comfort:** FLEX 160° technology that fits every face perfectly, flexible bi-material temples and absolute support without any pressure points.
- **No compromise on performance:** anti-scratch / anti-fog coating, panoramic vision and ultra-wraparound protection.
- **No compromise on style:** lenses with a refined design and coloured temples by Bollé Safety.
- **No compromise on affordability:** SILEX is suitable for everyone with an excellent price/quality ratio.

RESPIRATORY EQUIPMENT

IDENTIFY THE HAZARDS - dust, metal fume, gas, vapour.

ASSESS THE HAZARDS - measure the hazard level/other protection - skin & eye.

SELECT THE RESPIRATOR - disposable, half mask, full face, powdered airline.

HAZARDS:

1) DUST:

Formed by the breaking down of solid materials, the smaller the dust particles the greater the hazard presents.

2) MISTS:

Formed by the processes that involve atomisation (such as spraying), mists consist of tiny droplets.

3) FUMES:

Formed by the vapourisation of a solid material by the application of extreme heat. Extremely fine particles are created as the vapour cools and condenses.

4) VAPOURS:

A gaseous state formed by evaporation from substances that are normally either solid or liquid at room temperature. A fume may form as vapour condenses.

5) GASES:

An air-like substance at room temperature that has the ability to diffuse and spread quickly and travel far.

EUROPEAN STANDARDS

Our respirators are tested to the relevant European Standards. All respirators carry the CE mark plus the European Standard and performance category markings:

EN149 – Filtering facepiece and particulate respirators

EN405 – Valved filtering half mask respirators for gases and/or particulates

EN140 – Half mask facepieces

EN136 – Full facepieces

EN137 – Self-contained open-circuit compressed air breathing apparatus

EN143 – Particulate filters

EN146 – Powered Respirators – Hoods & Helmets

EN147 – Powered – Full Face Masks

EN270 – Heavy Duty Supplied Air

EN402 – Escape Apparatus. SCBA with full face mask or mouthpiece assembly

EN529 – Respiratory selection, use and care

EN1146 – Compressed air escape apparatus with hood

EN1835 – Light Duty Supplied Air

EN12941 – Powered Respirators – Hoods and Helmets

EN12942 – Powered Respirator Full Face Masks

EN14387 – Gas & vapour filters

TAKE CARE AND PROTECT YOUR AIR

Read the information on this page to help you choose the right breathing protection.

Due to current global shortages, prices and availability on these products may be affected. Please contact our sales team to discuss your requirements.

CMT are the first UK manufacturer to produce certified Type II, IIR and 3-Ply face masks

**No.1 UK
Manufacturer
of Certified
Face Masks**

Our extensive knowledge of personal protective equipment and our commitment to leading innovations in safety, led us to start manufacturing surgical and standard use masks. Producing millions of masks per week with constant expansion to accommodate demand.

Masks are fully certified to EN14638:2019, with official certification and test reports in English - making it clear and simple to process through your own compliance systems.

Production facilities are based at the same complex as our head office, with over 400,000 sq. ft. of manufacturing and warehousing. Get in touch to book a visit, and see the manufacturing process from raw material to finished masks with your own eyes.

Type II, IIR and 3-Ply face masks are available in a range of pack sizes and packaging options, including own branding

Our focus is on helping you in guaranteeing a consistent, secure supply of UK manufactured masks at more competitive rates than offshore-sourced products.

Benefits of ordering through an accredited UK supplier rather than importing:

- Removes any risk of inconsistent supply
- Save weeks of time on delivery
- Deal with a professional UK team
- Avoid overstocking with reduced MOQs
- Supports UK manufacturing
- Avoid exchange rate fluctuations
- Supports our economy

Call us: **020 8311 1144**

PPE Recycling

Secure
Sustainable
Solutions

CMT has teamed up with one of the UK's leading secure destruction specialists to provide a nationwide service for the secure destruction and recycling of all types of PPE. As well as improving your carbon footprint and protecting the environment, this service can also be used as a secure way to protect your brand. All materials can be collected from your site and taken to a secure facility where it is destroyed by shredding and recycled.

1 Order your recycling station with one of our sales team using code: **SBRP**

3 Choose either a 1, 2 or 4 week collection time frame and we will collect the bin and take the items to a secure recycling facility

2 We deliver your recycling point to your chosen delivery address.

4 We will provide you with a Certificate of Destruction if required, giving you peace of mind

Footwear

Hearing Protection

Eyewear

Gloves

Helmets

Respiratory Equipment

Workwear

Working in conjunction with our Charity Partners some of the unbranded garments can be sent out to 3rd world countries in support of less fortunate communities

CMT embraces the circular economy concept, whereby we keep resources in use for as long as possible, extract the maximum value from them whilst in use, then recover and regenerate products and materials at the end of each service life.

FACE FIT TESTING

Qualitative Fit Testing can be used on what are defined as tight fitting respirators, with the exception of full face masks.

Qualitative Fit Testing can be used not only as a test method to ensure your employees are properly protected; but also as a very effective way of training them in the correct way of fitting a mask. Dust and half masks commonly fail to do the job they are intended to do because of poor fitting and care by the user.

GARMENT PRINTING & EMBROIDERY

We offer a range of in-house garment decoration options

We'll work with you to print your garments exactly how you need them and we're dedicated to providing you with a reliable, cost effective and fast service

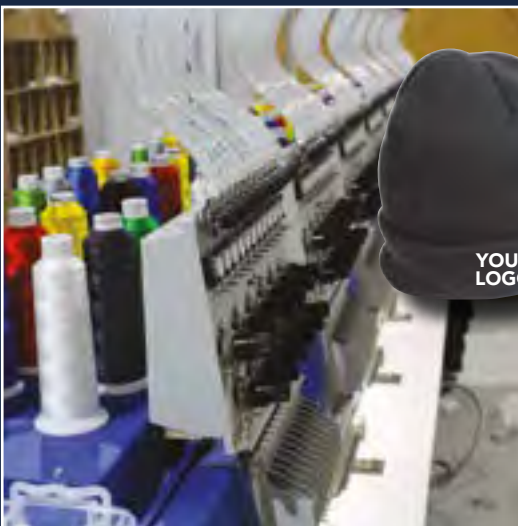

HEAT TRANSFER

Printed designs are often best suited for larger and more intricate designs, and tend to behave better when applied to lighter weight materials, such as reflective vests and jackets. The downside is that they tend to have a shorter lifespan than embroidered alternatives.

EMBROIDERY

Embroidery gives a high quality and long lasting result that is perfect for staple workwear items such as polo-shirts and fleece jackets. Ideal for most standard company logos, embroidery is more durable and can survive multiple washes, often retaining its quality for the lifetime of the garment.

PROTECTION THAT DOESN'T COST THE EARTH

100% recycled polyester

Recycled clothing is chopped into pieces.

Pieces are processed into raw polyester material.

Polymerisation produces ECO CIRCLE™ fibres from Jiaren, Japan.

We take these fibres to create EcoViz® rp – a polyester fabric that fully conforms to ISO 20471.

100% recycled polyester

PPE Recycling

Secure
Sustainable
Solutions

CMT has teamed up with one of the UK's leading secure destruction specialists to provide a nationwide service for the secure destruction and recycling of all types of PPE. As well as improving your carbon footprint and protecting the environment, this service can also be used as a secure way to protect your brand. All materials can be collected from your site and taken to a secure facility where it is destroyed by shredding and recycled.

1 Order your recycling station with one of our sales team using code: **SBRP**

2 We deliver your recycling point to your chosen delivery address.

3 Choose either a 1, 2 or 4 week collection time frame and we will collect the bin and take the items to a secure recycling facility

4 We will provide you with a Certificate of Destruction if required, giving you peace of mind

Footwear

Hearing Protection

Eyewear

Gloves

Helmets

Respiratory Equipment

Workwear

Working in conjunction with our Charity Partners some of the unbranded garments can be sent out to 3rd world countries in support of less fortunate communities

CMT embraces the circular economy concept, whereby we keep resources in use for as long as possible, extract the maximum value from them whilst in use, then recover and regenerate products and materials at the end of each service life.

ARC FLASH & FLAME RESISTANT CLOTHING

Make the smart choice for Arc Flash and Flame Resistant garments.

 **100% INHERENT**

 **LIFETIME SEAM GUARANTEE**

 **THERMSAFE COMPONENTS**

Combined Ebt/ATPV Ratings

Garments can be layered to achieve an overall Arc Thermal Performance Value (ATPV) or Energy Break open Threshold (Ebt) rating. For example, thermals may achieve an Ebt of 4.3 Cal/cm², and an outer coverall may achieve an APTV of 13.6 Cal/cm². However the combination APTV will be greater than the sum of the two single layers, as the air gap between the two layers affords the wearer additional protection.

WHAT MAKES FR CLOTHING DIFFERENT?

- Self extinguishes or resists ignition
- Does not melt onto skin
- Provides thermal insulation from heat
- Resists breaking and exposing skin
- Reduces burn injury & increases chance of survival

THE COST OF A SINGLE BURN INJURY CAN BE MORE THAN THE COST OF AN ENTIRE FLAME RETARDANT CLOTHING PROGRAMME

If workers are in a dangerous environment where heat & flame are present, it's in the employer's responsibility to ensure they are protected.

FR clothing is an investment; not only does it help prevent the potentially huge costs of an incident occurring, it is also better quality & lasts longer than standard clothing, leading to savings in the long term.

Q SIGNS

Temporary Plastic Road Signs

- The Q Sign is a temporary plastic road sign which is extremely strong & robust which gives it durability & a long life
- Pedestrian & car friendly
- It is easy & safe to handle with no sharp edges & has a simple folding system for quick deployment & storage
- Being an all plastic design the product will not conduct electricity or rust
- The product can be completely recycled & reused at the end of its life
- Specific colour front section available with minimum run
- 750mm: 30 per pallet / 600 x 450mm: 50 per pallet

All temporary traffic signs must be able to withstand three different classes of wind speeds with the use of a ballast. The standard BS 8442:2015 states the three classes as the following:

- Class A: 26.3 m/s (58mph)
- Class B: 17.6 m/s (39mph)
- Class C: 8.7m/s (19mph)

The Q-Sign was tested under strict conditions at the Full Scale Wind Tunnel at Mira to determine at which wind speeds the sign can withstand. Below are the results for the 600mm & 750mm Triangle and Circle Q-Sign.

These results are a guide as to the recommended ballast weight for each Wind Class:

<p>Class C ✔ Passed</p> <p>Withstood up to 26mph</p> <p>Recommended Ballast Weight: 0Kg</p>	
<p>Class B ✔ Passed</p> <p>Withstood up to 42mph</p> <p>Recommended Ballast Weight: 10Kg</p>	
<p>Class A ✔ Passed</p> <p>Withstood up to 59mph</p> <p>Recommended Ballast Weight: 30Kg</p>	

Tested at MIRA

(additional charges may apply)

ALL YOUR BESPOKE CONSTRUCTION SIGNS PRINTED IN-HOUSE FOR FAST DELIVERY!

Our sign printing machines complement our printed clothing and embroidery services & enable us to provide a complete service for all your sign requirements

HERE'S A FEW EXAMPLES OF WHAT WE CAN DO...

- Metal road signs**
- Scaffold protection mesh & banners**
- Labels & stickers**
- Safety signs, safety boards & posters**
- Printed hoardings & site boards**
- ...and much more!**

CREATE YOUR BESPOKE SIGN

in three simple steps

1

Select your required size:

A4	A3	A2	A1	200mm x 600mm	280mm x 90mm	450mm x 150mm
----	----	----	----	---------------------	--------------------	---------------------

2

Add all required elements

Include any text, logos or other graphics you need.

3

Call us on **020 8311 1144**

And quote one of the following codes (depending on the size):

BS-PVC-A4 (A4)	BS-PVC-A3 (A3)	BS-PVC-A2 (A2)	BS-PVC-A1 (A1)
BS-PVC-2060 (200 x 600mm)	BS-PVC-289 (280 x 90mm)	BS-PVC-4515 (450 x 150mm)	

BESPOKE SIGNAGE PRINTED IN-HOUSE FOR NEXT DAY DELIVERY

Choose your layout & we'll do the rest
